

Ductwork Layout for Oskar Unit

Questions:

1. Ductwork to run above the ceiling and drop down over each grinder. What is your ceiling height?
2. What size connection is on each grinder? I am trying to determine the part I need to connect to each machine. Is there a flange on the machine? If not what is. Can you take a picture.
3. Can you fill in the dimensions on the drawing above.
4. Electrical requirements.
Motor is 2Hp 460 volts 3Phase 60 Hertz TEFC
Full load amperes are 4.0
