**BINKS REINVENTS THE AIRLESS SPRAY GUN
WITH THE TOUGH NEW PITBULL™ LINE.**

(March 2010) Glendale Heights, IL – The new Binks PitBull™ Airless Spray Guns feature a patent-pending fluid valve which eliminates the traditional needle/spring construction. Binks unique tungsten carbide valve lasts up to twice as long, eliminates spitting and reduces trigger pull. The PitBull “NO NEEDLE” design results in better performance and lower maintenance than ordinary airless spray guns.

Operators will feel the difference thanks to the contoured handle design in a gun body made from durable forged aluminum with a light trigger pull for reduced operator RSi risk.

Contractor Mark Martinez of TOPARCO, Inc. says the Binks PitBull is “Flat-out, the best airless spray gun I’ve used in my twenty-one years of experience. Easy to clean and maintain, it keeps me on the job.”

Available in 3500psi and 7500psi models, the Binks PitBull airless guns are built to outlast the competition with tungsten carbide wear parts in a range of twist tip and fixed flat tips, providing superb atomization and spray performance. Tips and guards are color-coded for easy identification. Parts rated for 3500psi are black in color; parts rated for 7500psi are gray in color.

An extra long in-built fluid filter provides 20% more filter surface and fills from the inside. This prevents paint blockages and reduces the frequency of filter cleaning and changes. Binks PitBull Airless Spray Guns are available with a wide range of quality accessories, including extensions and hoses.

Choose Binks Airless Spray Guns for the ultimate in spraying performance and comfortable design with built in durability and a long work life.

Features and benefits of the Binks PitBull Airless Spray Gun line include:

- "NO NEEDLE" construction for quick and easy cleaning and maintenance — less downtime
- Innovative, patent pending valve design eliminates needles and springs
- Four finger models offer lower trigger pull and better leverage
- Two finger models provide more control
- Tungsten carbide wear parts for long life
- Lower trigger pull and 3-D ergonomic handle reduce fatigue
- Large, long-life filter fills from the inside so it won't collapse
- Long life filter in handle is 20% larger than competitive brands
- The 3500 gun package includes: Spray Gun, Tip Guard, (2) 60 mesh Fluid Filters and a Spray Tip
- The 7500 gun package includes: Spray Gun, Tip Guard, (2) 60 mesh Fluid Filters, (order tip separately)

Typical applications include:

- Contractor use including building interiors and exteriors
- Marine and Ship Building
- Farm and Agricultural Machinery
- Off Road Vehicles
- Industrial Metal Structures including bridges, fencing and frameworks
- Skips and Dumpsters
- Bus and Truck Manufacturing including undercoating applications
- Offshore Gas-Oil Industry and Corrosion Protection
- Fire Retardant Paint applications
- Trains and rolling stock

Binks pioneered the development of liquid spray finishing technology over 100 years ago and continues to set the standard for industrial spray finishing. For further information about Binks products, please call customer service at 1-800-992-4657 or visit the Binks website at www.binks.com.
