Subject Operation and Maintenance Data- Project Closeout (Fourth Notice)
Reason Please Reply
Correspondence No. 00472

Please provide the required documents for O & M Manuals and Project Closeout that pertain to your scope of work no later than **Tuesday, May 3, 2011**. As mentioned in our last sub meeting, 4/20/11 and referenced in the meeting minutes, we will hold further payments until your documents have been received. This should not be a surprise since this is now my **FOURTH** memo requesting the O & M Manuals. The previous memos sent dated 1/11/11, 1/26/11, and 4/08/11.

Attached is a detailed list of documents within the specifications that are required for Project Closeout. The item required is indicated with an "X". If I received the item, it will be highlighted, date received, and format received (pdf version and hard copies). Although I may have received either the pdf version or the hard copies, until I received BOTH the pdf version AND (7) seven hard copies of all documents, your package is NOT complete. This list serves as a guide only and does not alleviate your responsibility to read **ALL** your specifications regarding closeout requirements, particularly Spec Sections 017700, 017823, 017839, 017900, 019113, and 410800. Read these specifications in detail.

This list will also serve as a guide for the required "Extra Materials" required to leave on-site. Until these materials have been accounted for and signed off by one of our DBK superintendents, it will not be accepted. This does not include scrappings and miscellaneous materials left behind.

If you have any questions or think that there is an error within the list, do not hesitate to call or email me.
