

WB-WM-1055 Submittal (60 Inches Deep Welding Panel)

WALL MOUNT PANEL SPECIFICATIONS

Avani Model WB-WMP-1055

(60 Inches Deep)

- Basic Dimensions: 60" X 84" High
- Panel Steel: 18 Gauge
- Panel Frame Steel: 1.5" Square Tubing; 16-Gauge
- Cross Bracing Steel: .5" Square Tubing; 16-Gauge
- Mounting: Panel mounts with a Total of 12 fastener; 4 to the wall and 8 to the floor. The frame steel facing the wall will have 2 plates seam welded with 2 holes on opposing sides. The panel will have 2 legs for stability and each leg will feature a 4 hole, 4" square plate that can adjust up to 2-inches.
- Finish: Panel will have an industrial power coat finish; Color: Blue is standard; (other colors are available)
- **PLEASE NOTE:** A wall panel is not suited for equipment requiring stanchions such as hanging fume arms and it is not recommended to use wall panels to support ventilation system ductwork. Wall panels should only be used in areas where duty is expected to be light due to the potential of masonry fasteners of loosening if hit hard by equipment or personnel.
- Panels can be fitted with hardware for welding curtains required for welding safety but this hardware is not standard for panels due to 2 panels being required for hanging a welding curtain.

This product has not been tested for seismic calculations.
