

June 7 2011

AGFA Inc.
5975 Falbourne Street
Mississauga ON
L5R 3V8

Attention: Frank Ludgate, Mark Schnittke & Van Can Ngo

Quotation Number: 1112020 REV 1 for BLANKET ORDER
ADDER REV 1 Sieman contactor for control panel

Thank you for the current business and the opportunity to present a long-term solution and partnership in supplying a total package versus just the Absolent equipment. Based on the package supplied by AGFA, the following is our proposed solution:

Design Criteria:

The following criteria are the base for the recommended equipment.

- Required Airflow: 50 - 150
- Contamination: Oil (off gasing from drying ink on polyester material), water vapour
- Inlet Load: 26 mg/cu.m.
- Type of Machine: Aquajet printer Model 3324WBT

Absolent Package (Based on 15 Units):

	Nov 2008	Jan 2011	
Absolent ODF-1000S Mist & Smoke Collector Agfa custom colour	\$4808.00	\$5350.00	Powder coated in
Absolent ODF-1000S 10" Leg Extensions w/ Stabilizer - Drilled out to allow for ¼ -20 Bolt and Lock-Nut Inside	\$ 55.00	\$ 55.00	
Custom Color Powder Coat: Protech Chemical Powder as per Agfa specifications	\$ 185.00	\$ 185.00	
- Absolent ODF-1000S - Absolent Leg Extensions

1. Uncrate ODF-1000 from Sweden
2. Cut and Install leg extensions (10") over existing stub legs. Drill through to allow for a ¼ - 20 bolt to be placed and a lock-nut to be placed inside and **record**
3. Remove filter cassettes and verify fiber one (S10B3/ 595). Remove Absolent part numbers and identifications (remove plates, rivets) Replace with decals or new plates provided from Agfa. Remove owner's manual and replace with Agfa manual. Agfa label in the center of the upper door and **record**.
4. Stand ODF upright to remove junction box.
5. Install ventilation collar over the hole on the LEFT side of the unit using self tapping screws. Seal any possible holes and record.
6. Install steel elbow and 45 degree valve for drainage with a downward slant for better drainage and **record**.
7. Install new electrical box and make all necessary connections. Ensure that 15' 14/5 wire is attached to the electrical box via proper strain relieves for on site connection.
8. Install the vent hood onto the unit using a thin bead of clear silicone on top outside of provided screw holes. Use 16M 5 x 14 screws and nuts using large washers (5/8") and use a small amount of Blue 425 medium strength Loctite on each screw. Place a small bead of silicone on the inside upper portion of the vent hood and **record**.

9. Install duct assembly.
10. Connect unit to electrical power.
11. Check fan rotation and **record**.
12. Check for vibration and **record**.
13. Check amps and **record**.
14. Hypot test unit and **record**.
15. Check control panel on/off, lights, disconnect and overall appearance and **record**.
16. Check the Absolent gauges and **record** Static Pressure.
17. Check Static Pressure on I duct adjust fresh air damper to correct reading and **record**.
18. Test and record Airflow and **record**.
19. Check for air leaks and **record**.
20. Check fit and finish of complete unit and **record**.
21. Bubble-wrap the collector while standing.
22. Lay collector into new crate. Insert I duct assembly. Raise sidewalls and assemble. Band collector crate to insure stability for freight carriers.
23. Provide complete check-list upon completion.

	Nov 2008	Jan 2011
