Bill

This project goes back four years. I will give you the folder during your visit in the south.

Bob Filipski is the maintenance supervisor. I have been in testing and they have high counts so the ODF series was not an option. The owner never would approve even a demo unit due to our costs, however they have NEW plant that has become yellow due to non efficient mist collectors. I would estimate over 90 screw machines and 8 HydroMats, plus other equipment. Bob and I have been communicating for about three years with no luck. They have Smog Hogs and Royal Filter Mist Units.

Bob's office number is (716) 898-7844.

Ed
