PRODUCT UPDATE

VENTILATION SYSTEM FOR YOUR CUTTING TABLE

The **MAXTRAC** Ventilation System designed primarily for the capture of smoke and related contaminants from Plasma or Oxy-Fuel cutting tables where a water bed may or may not be present. Conventional downdraft systems that are generally ineffective for larger cutting tables and certainly out of the question where a water table is utilized. The **MAXTRAC** system employs a high velocity intake slotted hood that is affixed to the table's gantry, shown in the right-hand photo above, along with a travel duct and trolley, both of which are depicted in the left-hand photo above. Not shown, is a powerful exhaust fan with optional filter unit.
