Remark:

1. The speed meter and static pressure indicator is located in dia Dia. 6 " x 8 times of the flexible pi from the suction
2. The total length of the flexible pipe is dia Dia.6 " x 16 times.
3. The Max C.F.M is measured when the intake is dia. Dia. 6" x 1 holes and Max. Static pressure is measured when the diameter of intake port is full closed.
