Thank you for allowing Avani Environmental Intl., Inc. (Avani) the opportunity to share the Absolent Fiber Bed line of mist and smoke collectors. Since 2001, we have sold and installed over 6000 units within North America. Absolent focuses on life cycle cost, efficiencies and guaranteed performance. Fiber bed technology is completely different from the traditional technology known and used in the mist and smoke collector universe. This technology thrives are being "wet" and can handle all the tough applications most competitors walk away from.

Absolent has been designed and engineered to go two to five years before maintenance is required exhausting below .5 mg/m. Absolent was developed for high pressure, heat treat, cold heading, forging, and tough processes. If your not seeing the results you demand, Absolent is the right choice.
